

## RIDE, RUN N RECORD

A new app allows you to record your route and see your stats: top speed, average speed, distance and time. Drop pins show you the details within a few feet of your route on a Google Maps layout to keep track of where you were. With the Comparison Button, overlay your newest run on top of yours or a competitor's last run to help you improve. Upload your route and find new places using the online feature – see others' favorite spots and their stats. Just open the app, name the run, lock the phone and go! Available for iPhone, iPod Touch and iPad, iOS 4.2 or later.

## GOPRO

GoPro has just made it easier for people to capture professional-quality content during any activity. The company has officially released its Wi-Fi BacPac™ + Wi-Fi Remote Combo Kit, allowing people to control multiple GoPro cameras at a time using either a smartphone, tablet or the included waterproof Wi-Fi Remote. Additional features include live streaming video from GoPro cameras to smartphones, tablets and directly to the Web. The waterproof and wearable Wi-Fi Remote can control up to 50 GoPro cameras at a time from a range of 600 feet (180 m). [gopro.com](http://gopro.com)

## MONSTER PAINT

Monster Paint is an easy-to-apply aerosol spray that seals and protects your deck. It means that artwork stays beautiful while you're able to have some actual grip on your deck. It takes up to 24 hours to cure and one can grips up to five decks. Distributors include [vkskate.com](http://vkskate.com) and [litezpeed.com](http://litezpeed.com).

## TRACKER

Artist and animator John Lamb created the first surfing animated cartoon, "Secret Spot," in 1973, and also the first skateboarding animated cartoon, "High Drive," shown in *Spinn'in Wheels* (1975). John went on to win an Academy Award in 1980 for Scientific & Technical Achievement in Animation. John was also placed into the Rock and Roll Hall of Fame in 2011 with his cel from the Tom Waits video "Tom Waits for No One." John created the art on this vintage retro line of early '70s Tracker skateboards, pulling from his archive of images created back in the day. Tracker's line of vintage retro skateboards are built with the highest quality aerospace aluminum and space-age heat-treated hardware. [trackertrucks.com](http://trackertrucks.com)

## ROAROCKIT

The Roarokit Skateboard Company has recently expanded to meet the needs of independent board builders and classrooms around the world. From the new RockitRuler (used to find the center line and align truck holes) to their popular Summer Camps and spacious new workspace in Toronto, Roarokit continues to be the leader in the DIY skate/longboard community. Also recently introduced is their 1/16" solid birch veneers (not your lum-

beryard plywood), glue and high-density foam, plus – finally! – drastically cheaper shipping rates to their USA customers! [roarokit.com](http://roarokit.com)

## AIRFLOW

Balance Master is designed by three-time Downhill Skateboard World Champion Martin Siegrist and consists of a rubber ball and a board. In contrast to most other products on the market, the Balance Master uses a ball, hence it rolls freely in all directions. The deck features a unique triple core with a flat bottom and a concave standing platform for proper board feel when balancing. Six replaceable cushions eliminate noise when falling off the ball and avoid scratches on flooring. Riding a Balance Master will take your balance to the next level and strengthens feet, ankles, knees and core. [airflow-skateboards.com](http://airflow-skateboards.com)

## JELLY

Jelly Skateboards possess a tremendous flexing ability, which is made possible by using high-impact engineering-grade materials. By using cutting-edge materials they are able to create a rather unique riding experience. The result: The flex of a snowboard meets the flow of a surfboard.
